

## Identificarea articolelor, proceeding-urilor ISI

### Care sunt revistele/articolele ISI?

Prezintă trei subproduse (baze de date): **SCI-E** (Science Citation Index-Expanded), **SSCI** (Social Sciences Citation Index) și **AHCI** (Arts & Humanities Citation Index).

Ceea ce numim noi **Cotat ISI** sau simplu **ISI** se referă la **revistele listate în aceste trei produse** (SCI-E, SSCI, AHCI). Toate cele trei baze de date sunt accesibile prin intermediul platformei **Web of Science** (<http://isiknowledge.com>) cu acces în rețeaua universității.

**Articolele cotate ISI** sunt documentele de tip **Article, Proceeding paper** listate în SCI-E, SSCI sau AHCI.

**Nu sunt articole ISI** alte tipuri de documente cum ar fi scrisori, recenzii, materiale editoriale, rezumate, etc. (ex. **Letter, Editorial, Book review, Meeting Abstract**).

### Articol ISI vs ISI-Proceedings?

În cele trei baze de date ISI (SCI-E, SSCI, AHC) pot exista articole de tip Proceeding paper. Este foarte important ca **articolele cotate ISI de tip Proceeding paper NU SUNT ECHIVALENTE cu ISI-Proceedings**.

**ISI-Proceedings** reprezintă alte două baze de date: Conference Proceedings Citation Index-Science (**CPCI-S**), respectiv Conference Proceedings Citation Index- Social Science & Humanities (**CPCI-SSH**).

Un **Proceeding paper este ISI** numai dacă se găsește în bazele de date **SCI-E, SSCI** sau **AHCI** (cu alte cuvinte, lucrarea a fost publicată într-un supliment a unei reviste cotate ISI și nu într-un proceeding propriu-zis).

### Identificarea articolelor cotate ISI (de tip Article sau Proceeding paper):

1. La căutarea în Web of Science se **debifează CPCI-S și CPCI-SSH**.
2. Se lasă **bifate exclusiv** cele trei baze de date: **SCI-E, SSCI, AHCI**.
3. La fiecare rezultat se **verifică** la **Document Type** dacă scrie Article sau Proceeding paper.
4. Se verifică afilierea autorilor.

**Abstract:** Larvae of *Epidalea (Bufo) viridis* showing cannibalistic behaviour were observed in June 2006 in a pond from Oradea city, western Romania. This is the first record of such behaviour in the country and probably was induced by the scarcity of food and the high density of larvae present in the rapidly drying pond in which they occurred.
