## THE MESSAGE OF THE RECTOR OF „PETRU MAIOR” UNIVERSITY OF TÎRGU MUREȘ

**Dear guests,**

*Dear Guests,*

First of all, as Rector of „Petru Maior” University, the organizer of the Conference *European Integration - Between Tradition and Modernity*, I'd like to warmly welcome all the participants.

The International Conference *European Integration - Between Tradition and Modernity*, has become a tradition in the academic life of „Petru Maior” University of Tîrgu Mures, bringing together within a generous range of topics scholars and researchers from different scientific fields of tremendous importance for the contemporary society, a society that is supposed to secure its future not only on the economic and ecological level, but also on the spiritual one.

„Petru Maior” University has had a complex evolution since its foundation in 1960 and, after 1990, this dynamics has grown, our institution playing a more and more important role both at local and national level. Its openness towards the social and economic environment, the eagerness to respond to all the challenges of the contemporary world, the collaboration and partnership with many institutions and business associates has placed our university in a privileged position, with a well established integrating role in shaping and developing highly qualified professional competences.

We live in a society of knowledge, from which we benefit directly in our everyday life. *Non scholae sed vitae discimus (We do not learn for the school, but for life)* becomes a creed that every academic institution has to put into practice by means of its activities. The distance between education and research is very short, especially in academic systems. Research generates new knowledge, creates a favorable atmosphere for change, and provides people with information and data which help them to become aware of the mysteries of the universe and to make the most of their activity in all fields of knowledge.

„Petru Maior” University of Tîrgu Mures, the host of this special event, is permanently changing and gaining new valences. Our specializations, assets, human resources and research grants are all in an upward dynamics, which proves that we are on the right track and also gives us the certainty of our continued existence as an institution with clearly defined and completely assumed missions. The International Conference *European Integration - Between Tradition and Modernity*, which is at its 6<sup>th</sup> edition, integrates into the tradition of far-reaching scientific events that have been taking place at our university throughout time.

I wish to express my hope that this scientific event will take place under the most favorable auspices and that it will represent a remarkable starting point for further evolution and development in the field of knowledge. Let this international conference provide a good opportunity for us to gain and transfer knowledge, to generate new theories in the world of science - essential aspirations of any contemporary research.

I wish this conference to be a complete success, and to all participants happiness, health and a pleasant stay in our university!
