SAIP Automation is a German company with headquarters in Romania, Advanced Partner of SIEMENS AG Germany and authorized SIEMENS product distributor for Substation Automation, Grid Protection, Power Quality and Industrial Automation. We employ a team of highly specialized project engineers and managers to implement integrated and comprehensive solutions in Secondary Technology, anywhere in the world, with commitment, competently, reliably and cost-effectively.

Core competencies of our team are SCADA, HMI, plant, station and substation control and automation systems in the fields of electrical and wind power, hydropower plants, traction power supplies as well as oil and gas pipelines based on the complete SIEMENS product range in those market segments.

Our capabilities include Design, Engineering, Data Modelling, Parameterization, Programming, Factory Acceptance Tests, Delivery, Commissioning, Site Acceptance Tests and Troubleshooting, Update and Maintenance for systems and components of the product lines SICAMSICAM PAS/CC/SCC, SIPROTEC/Digsi and SIMATIC S7/PCS7/WinCC/WinCC-Flexible.

All our project engineers have gone through the tough official SIEMENS Power Academy and/or SITRAN Programmers certification procedure with standardized Curriculum Vitae. So far we have acted as subcontractor of SIEMENS subsidiaries as well as many other general contractors and thereby implemented hundreds of projects around the world or just realize this.

In this context we offer the following job:

AUTOMATION / SCADA ENGINEER - SIEMENS SICAM

Job description:
- Planning, design, assembling, wiring and test of SCADA and automation systems
- Configuration, parameterization and programming of SCADA systems, automation units, RTUs, Gateways and BCUs (SIEMENS SICAM PAS, SIPROTEC);
- Test and commissioning of automation units, RTUs and HMI for worldwide projects;
- Design, configuration, testing and commissioning of SCADA HMI Softwares (SIEMENS SIMATIC WinCC);

Desired skills and knowledge:
- Superior technical studies in automation, electronics, electrical engineering, telecommunication or programmers (engineer or IT/programmer diploma required);
- Studies grades over average;
- English – Minimum B1 level required (*French* or *German* as advantage);
- *SIEMENS SICAM PAS / SICAMSIMATIC WinCC / SIMATIC S7* knowledge as advantage
- Other SIEMENS technologies knowledge as an advantage;
- MS Office knowledge (Excel, Word, PowerPoint, Outlook, etc);
- Networks and communication systems knowledge as an advantage;
- *SPS, PLC programming* as an advantage;
- Teamwork ability;
- High willing to learn;
- Willing to travel abroad for international projects;

Our offer:
- Minimum 3 years contracts;
- Attractive salary package;
- Intensive trainings, courses and certifications;
- Modern environment and long term development career planning;
- International experience;
- Prizes and bonuses;
- The office will be in Tg. Mures;

Please send your CV (in English or German) with an actual photo, cover letter and a copy of your diplomas and certifications to email until 15 October 2016 to:
