A WORD
FROM THE PRESIDENT OF THE CONFERENCE

Dear Guests,

Having established a certain tradition in the recent years, the International Conference Literature, Discourse and Multicultural Dialogue (now at its 5th edition) intends to unite emerging scholars, as well as prestigious researchers from different fields of radical relevance for the contemporary society, a society that is supposed to secure its future not only on the economic and ecological level, but also on the spiritual one. Literature, the cultural discourse as well as the arts gain new connections and dimensions through fundamental changes and structural progress, so that the social end-results of education and research becomes extremely important. It is a fact that in our postmodern times, we live in a society of knowledge, from which we benefit directly in our everyday life, but to the risks and dangers of which we are at the same time exposed. Non scholae sed vitae discimus (We do not learn for the school, but for life) becomes a creed that every academic institution has to put into practice by means of its activities. It is essential that the path between education and research is very short, especially in academic systems. Research generates new knowledge, creates a favourable atmosphere for change, and provides people with information and data which help them to become aware of the mysteries of the universe and to make the most of their activity in all fields of knowledge. In this interesting and captivating century, to the noble mission of educating the younger generations we must also add the fruit of the efforts in research, materialized in interesting works and papers, together with ideas generated by the creative ability which ennobles the personality of the academic.
I wish to express my hope that this scientific event will take place under the most favourable auspices and that it will represent a remarkable starting point for further evolution and development in the field of knowledge. Let this international conference provide a good opportunity for us to gain and transfer knowledge, to generate new theories in the world of science – essential aspirations of any contemporary research.

Prof. IULIAN BOLDEA, PhD
President of the LDMD 5 Conference
